

# enjoying office KURVE

## **KURVE**

As the office environment moves away from traditional segregated workspaces, the role of furniture in office design is becoming increasingly important.

Organisations are now creating office spaces that use products and furniture to engage and stimulate their employees.

Introducing KURVE. Featuring unique components that can be configured to create a variety of settings, KURVE is designed to help connect employees and promote effective communication.

KURVE is manufactured in Australia and is GECA certified.

## KURVE COLLABORATION

Although private workspaces are still necessary, there is an increasing trend towards 'zoning' the office into collaborative, more humanised work environments.

The KURVE lounge encourages informal interaction in a semi-private, yet acoustical setting. It allows employees to choose their preferred style of work, including one-on-one discussions, group brainstorming or social interaction.

Matching fabric screens have also been introduced to help enhance the zoning capabilities offered by KURVE.

# connect interact conference

## **KURVE CONFERENCE**

KURVE Conference optimises the open office environment by creating a defined workspace where employees can connect and collaborate.

Communication flows more easily in the KURVE Conference as people can see each other and interact as needed.

KURVE Conference features a task touch down space that connects to the screen on the pod perimeter, plus KURVE table connectors accommodate power and data cabling for seamless information sharing.
