AURA DESIGNED BY PAUL BROOKS

**Features**

Aura is a superb die cast aluminium framed stacking chair concept with distinctive character, proportions and presence, available with either an injection moulded plastic seat and back or upholstery. The curvaceously contoured seat and back provide great comfort while adding to the pleasing aesthetics and universal appeal of this design. A truly multi purpose design that is equally at home in meeting rooms, conference facilities or an outdoor café terrace.

**Finishes**

Frames are polished or silver powder coated and the design offers arms, with or without 'soft touch' pads, as well as linking. In its plastic version, with painted frame, Aura is suitable for exterior use and is available in six colours.

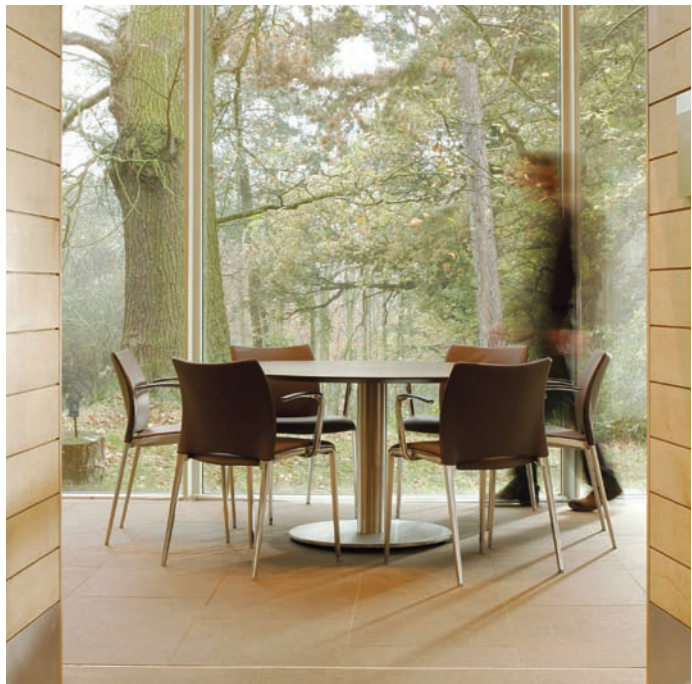

**Certifications**

**Design: Paul Brooks**

Paul Brooks graduated from Ravensbourne College of Design to go onto the RCA before joining the design team of Robert Heritage, OBE RDI, in 1983. Paul established his own design practice in 1988 and has since worked for a host of UK, as well as European furniture manufacturers becoming a well established figure in the design community with many highly successful designs to his credit.
