

Features:

The CP1 is the first of a series of concepts for a compact range presented by Australian designer Charles Wilson. It uses injection-moulded foam technology for the arms and back piece to achieve organic forms not possible with traditional methods. Each piece is extremely comfortable, providing ample seat space and support.

Side tables and coffee tables complement the range with their own character and presence. 100% Australian made.

Finishes:

CP.101 available with pedestal and wire base with matching side table.

CP.102 available in two lengths with matching coffee tables.

Coffee table and Side tables available in standard laminate and veneer finishes on a stainless steel base.
